

Wholesale rv circuit breaker in Atlanta

Overview

Why do RV circuit breakers trip?

Circuit breakers prevent your RV's electrical system from becoming overloaded and therefore, causing fire and electric shock. In other words, they act as a failsafe: they interrupt the power in case of an electrical surge. This is the main reason why they trip.

What are the different types of circuit breakers?

The industry currently offers a wide range of single- and double-pole circuit breakers to choose from. The former are probably the most popular ones. They are built to monitor the current of a single wire. Obviously, double-pole ones monitor the current of two wires and interrupt it simultaneously.

What types of electrical products does Dave Carter offer?

Our electrical product groups encompass both 12V and 120V products and range from all types of wire and cable, conduit, breakers/panels, receptacles, GFCIs, and LED lighting. Offering an extensive line of plumbing products, Dave Carter is a lead plumbing supplier in all industries we serve.
